

This two-volume book provides the first comprehensive survey of opioid research, a field which has accumulated a tremendous amount of literature since the identification of opioid receptors and their endogenous ligands. In more than 60 chapters experts present state-of-the-art reviews of this fascinating field, the topics ranging from molecular biology to clinical applications. Part I covers the multiplicity of opioid receptors, the chemistry of opiates and opioid peptides as well as the neurophysiology of opioids. Part II reviews a broad spectrum of physiological and behavioral functions and pharmacological actions of opioids, together with their neuroendocrinology, opioid tolerance and dependence, concluding with pathophysiological aspects and clinical use.

Growing Orchids. Book Four. The Australasian Families, Charm: An Amazing Story of a Little Black Cat (Volume 1), Volcanoes (A First Fact Book), Acceptance and Commitment Therapy: An Experiential Approach to Behavior Change, Twisted Souls (Twisted Souls #2): A Zombie Paranormal Origins Tale, Archean Crustal Evolution (Developments in Precambrian Geology),
