

The South Country

Perhaps the best way to think of *The South Country* is as a dream-map - by which I mean an act of imaginative cartography, a chart of longing and loss projected onto actual terrain. Robert MacFarlane's *Edward Thomas* is acutely sensitive to the rhythms of the countryside; Edward Thomas's lyrical, passionate, and sometimes political writing merges natural history with folk culture, and gives us a free-form record of the feelings and observations of one of the great poets of the English language. This centenary edition includes a preface by Edward Thomas's wife, Helen, and the stunning engravings of Eric Fitch Daglish.
