

Reflections in Personal Construct Theory

Internationally-renowned practitioners discuss the impact of reflexivity on their work, giving those new to personal construct psychology valuable insights and guidance on managing the therapeutic relationship. Reflexivity is a key methodological issue in psychological theory and practice, and is an area of growing interest. International contributors include prominent constructivist psychologists such as Richard Bell and David Winter. Will help constructivist therapists to gain a better understanding of the nature of personal constructs from the perspective of both client and therapist.
