

## Trauma: Critical Care: 2

Compiled by internationally recognized experts in trauma critical care, this source discusses the entire gamut of critical care management of the trauma patient and covers several common complications and conditions treated in surgical intensive care units that are not specifically related to trauma. Utilizing evidence-based guidelines where they exist, this all-encompassing source expertly analyzes procedures in analgesia and sedation, patient monitoring, infection control, nutritional evaluation, psychological support, and end-of-life care.
